TO THE READER

This Census Handbook is an attempt to collect the most often used state and county census data for Florida into one convenient reference book. The decennial census is, of course, conducted by the Bureau of the Census, an agency within the the U.S. Department of Commerce, on April 1 every 10 years. The first census was taken in 1790, and a census has been conducted every decade for 190 years. To apportion U.S. representatives fairly among states, Article 1, Section 2 of the Constitution calls for enumeration of the population at least every 10 years. In addition, the "one person, one vote" Supreme Court decisions, which required congressional districts within a state (as well as the state and local legislative districts) to be of nearly equal population, added a new demand for small-area census data. Also, the allocation of revenue-sharing and other federal and state funds among some 39,000 governments depends, to a certain extent, on census data. In addition, social and economic data assist marketing studies; academic research; federal, state, and local planning; affirmative action programs; and many other activities. Finally, the people of the United States expect information from the census about their community, state, and nation.

Florida is a fast-growing state, and many business and government planners, as well as various other persons, need detailed demographic information about the state and its counties. The Census Bureau releases volumes of data about Florida; this Handbook is a summary of what the editors hope is the most useful of those numbers. The general layout of tables and chapters follows the style of the Florida Statistical Abstract, also published by the Bureau of Economic and Business Research, University of Florida. The data are for April 1, 1980 or April 1 of another specified census year, unless otherwise noted on the table.

Because of the large numbers of older persons living in Florida, a special chapter has been devoted to presenting data about older Floridians. Valuable advice about the content of that chapter was received from the Technical Task Force of the Consortium for the Data Bank on Older Floridians, which operates under the auspices of the State University System.

The particular census report or summary tape which served as a source for each table in this Handbook is listed at the bottom of the table. In Appendix C is a discussion about sources of census information and how to find information on additional subjects or for sub-county geographical areas.

Also at the end of this Handbook are a glossary and a discussion of how to use census data. The latter section includes such matters as comparability with the 1970 census or other data series, sampling, confidentiality, nonsampling errors, corrected counts, etc.

The preparation of the Handbook was shared by many members of the staff of the Bureau of Economic and Business Research. Susan Floyd served as managing editor. Nancy Hurley was responsible for the required statistical computations and for coding and auditing the data. They were assisted by statistical aides Jerri Norris and Theresa Loper and student assistants Cindy Cuomo, Grace Johnson, Arlen Jones, Kevin Martin, Cynthia Moorhead, and Laura Pastore. Janet Fletcher, Linda Hunter, Pam Middleton, Laura Lillard, and Kathy Privett provided clerical assistance. Dorothy Evans was responsible for word processing. Evan Eldridge, Steve Seidenberg, Genevieve Floyd, Nellie Widener, and Phyllis Lee provided data processing assistance. They were assisted by graduate assistant Stan Payant and student assistants Keith Alexander, Dan Babione, William Jones, Karen Martin, Tim Parsons, Andrew Purinton, Steve Rooney, George Saenz, Wesley Thompson, Hector Urbistondo, and Dean Walsh. Faith Sincich retrieved data from census tapes. Ray Jones at the University of Florida Libraries provided valuable help and advice on the summary tape files. Janet Galvez assisted in accessing the BEBR Data Base. Neil Sipe and Robert Hopkins designed and processed the computer maps. They were assisted by graduate student Pat Thrifts. Ann Pierce provided editorial consultation, assisted by Kathy Cox. Isable Martinez prepared the regional maps and the cover. The staff of the University Presses of Florida provided production assistance and handles distribution.

We hope this Handbook proves useful to you and your organization.

A/ 1980 DATA FROM COMPLETE COUNT TABULATION; 1970 DATA FROM SAMPLE TABULATION.

B/ INCLUDED IN "OTHER VACANT" CATEGORY.

1/ VACANT UNITS INTENDED FOR SEASONAL OCCUPANCY OR HELD FOR MIGRATORY LABOR. IF SUCH UNITS ARE OCCUPIED BY PERSONS WHO HAVE A USUAL RESIDENCE ELSEWHERE, THEY ARE CLASSIFIED AS VACANT.

2/ ALL OCCUPIED UNITS PLUS VACANT UNITS INTENDED FOR YEAR-ROUND USE.

3/ UNITS OCCUPIED AS THE USUAL PLACE OF RESIDENCE OF ONE PERSON OR GROUPS OF PERSONS. BECAUSE A HOUSEHOLD CONSISTS OF ALL PERSONS WHO OCCUPY A HOUSING UNIT, THE COUNT OF OCCUPIED UNITS AND HOUSEHOLDS IS IDENTICAL.

4/ AWAITING OCCUPANCY.

SOURCE: U.S., DEPARTMENT OF COMME[illegible] BUREAU OF THE CENSUS, 1980 CENSUS OF HOUSING: GENERAL HOUSING CHARACTERISTICS, FLORIDA, HC80-1-A11, AND 1970 CENSUS OF HOUSING: DETAILED HOUSING CHARACTERISTICS, FLORIDA, HC(1)-B11.

*DATA ARE ESTIMATES BASED ON A SAMPLE AND MAY DIFFER FROM COMPLETE COUNT DATA; SEE DISCUSSION IN APPENDIX A.

NOTE: SEE TABLE 2.23 FOR TOTAL SPECIFIED OWNER-OCCUPIED HOUSING UNITS (MORTGAGED AND WITHOUT A MORTGAGE). SPECIFIED OWNER-OCCUPIED UNITS ARE ONE-FAMILY HOUSES ON LESS THAN 10 ACRES WITHOUT A COMMERCIAL ESTABLISHMENT. OWNER COSTS INCLUDE THE SUM OF PAYMENTS FOR REAL ESTATE TAXES, FIRE AND HAZARD INSURANCE, UTILITIES, FUELS, AND PAYMENTS FOR MORTGAGES, DEEDS OF TRUST, OR SIMILAR DEBTS ON THE PROPERTY.

1/ WORKERS WORKING OUTSIDE COUNTY OF RESIDENCE AS A PERCENTAGE OF THOSE REPORTING PLACE OF WORK.

2/ DATA ARE AGGREGATES OF THE TOTAL NUMBER OF PERSONS FROM ALL COUNTIES WHO WORKED IN OR OUT OF THEIR COUNTY OF RESIDENCE. A TOTAL OF 41,562 PERSONS (1.2 PERCENT OF WORKERS REPORTING PLACE OF WORK) WORKED OUTSIDE FLORIDA.

*DATA ARE ESTIMATES BASED ON A SAMPLE AND MAY DIFFER FROM COMPLETE COUNT DATA; SEE DISCUSSION IN APPENDIX A. THE SAMPLE SIZE FOR PLACE OF WORK WAS APPROXIMATELY ONE-HALF THE FULL CENSUS SAMPLE. THEREFORE, THE NUMBER OF WORKERS FROM PLACE OF WORK TABULATIONS MAY NOT AGREE WITH THE SAME CATEGORY SHOWN FOR OTHER TABULATIONS.

SOURCE: U.S.; DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS, 1980 CENSUS OF POPULATION: GENERAL SOCIAL AND ECONOMIC CHARACTERISTICS, FLORIDA, PC80-1-C11 AND 1970 CENSUS OF POPULATION: GENERAL SOCIAL AND ECONOMIC CHARACTERISTICS, FLORIDA, PC(1)-C11.

1/ THESE DATA PROVIDE SOME INDICATION OF THE NUMBER OF OLDER PERSONS LIVING WITH THEIR CHILDREN OR OTHER YOUNG HOUSEHOLDERS.

NOTE: BECAUSE A HOUSEHOLD IS DEFINED AS A PERSON OR PERSONS OCCUPYING A HOUSING UNIT, COUNTS OF HOUSEHOLDS AND OCCUPIED HOUSING UNITS ARE ALWAYS IDENTICAL.

HOW TO USE CENSUS INFORMATION: APPENDIX A

To use census data effectively, it is important to recognize and to understand certain limitations that exist with the information. These limitations should not discourage the user because the understanding of them can made the information even more useful for planning and analysis purposes.

Crucial to the use of any data series is an understanding of the definition of appropriate items. This understanding is particularly important with terms such as "family," "farm," "household," and "income," which are used loosely in everyday language but which have specific census definitions. Census terms are defined in a glossary in the printed reports and in the summary tape technical documentation. This Handbook has a glossary in Appendix B, which defines census items included on tables in this book.

Finding the census information needed for a particular purpose sometimes requires some creative thinking on the part of the user. This creativity is necessary when using census products released by the Census Bureau and probably also necessary when using this Handbook. For example, "single parents" in census terminology are "female (or male) householders with no spouse present with own children." These data appear on Tables 1.13 and 1.17. Table 1.13 records the number of children with a single parent under the heading "own children, with female (or male) householder, no spouse present." The number of total women and married women who have children appears on a labor force table, Table 6.05. An indication of the number of older persons who live with their children appears on Table 7.08 under the number of occupied housing units (households) with one or more persons aged 65 and over with a householder under age 65. Knowing that the definitions of occupied housing units and households makes these counts identical means that any occupied housing unit table provides data also on households and, of course, the reverse is also true: household tables also can be applied to the need of data on occupied housing units. The index should provide a means of finding the right table, but sometimes the census terminology is different from the way the data question is framed in the user's mind. Scanning the glossary (Appendix B) to understand the census approach to concepts and definitions could be a helpful way to gain a good understanding of what information is available.

The following sections provide information on additional items which must be considered when census information is used. The Census Bureau also provides a Users' Guide, Part A: Text (PHC80-R1-A) and Part B: Glossary (PH80-R1-B), which makes available more detailed discussions on these matters. The Users' Guide is available in most libraries.

Comparability of 1980 and 1970 Census data

The Census Bureau attempts to achieve a relative stability to the content of the census from decade to decade because of the need to measure how items have changed over time. Fortunately the continued relevance and usefulness of most basic items makes this stability possible. The Bureau avoids a significant increase in the number of questions to prevent an increase in the response burden on the American public. In 1980, however, in order to meet data needs, the Bureau did add new questions on carpooling and weeks looking for work.

The Users' Guide of the 1980 census and each of the printed reports contains extensive comparisons of the comparability of the 1980 and 1970 census items. the following areas present serious problems because of definition changes: the concept of "head of household" in 1970 and "householder" in 1980, the definition of rural farm population, counts by race and Spanish origin, computation of median age, data on language spoken at home, distribution of employment by occupation, and counts of condominiums. Data users should exercise extreme caution in attempts to compare 1980 data with 1970 data in these areas; and for this reason, comparisons in these areas to not appear in this Handbook.

When data are present in the Census Handbook for 1970, comparisons are valid except as noted in footnotes.

Comparability of 1980 Census Data with Data from Other Sources

Information on many subject areas covered by the census are also available in series released by other federal, state, or local agencies. These series are generally not comparable to census data because of differences in definitions, subject matter covered, time references, and enumeration methods. Census data come from respondents in households; most other data series come from administrative records collected by businesses or government.

Employment data from the census differ from statistics based on reports from individual business establishments, farm enterprises, and certain government programs. For example, persons employed at more than one job are counted only once in the census and are classified according to the job at which they worked the greatest number of hours. In establishment employment data, such a persons would likely be counted more than once.

The figures on labor force status from the census, however, are generally comparable with similar data collected by the Census Bureau and the Bureau of Labor Statistics in the Current Population Survey. The source of those data is also respondents in households, and the definitions are consistent. Some differences may exist because of variations in enumeration and processing techniques.

Income data in the census differs from income tax data, Social Security Administration earnings data, or the U.S. Bureau of Economic Analysis (BEA) income series because of differences in definitions and reporting methods. Aggregate income estimates based on the income statistics in the census reports are usually less than those shown in the BEA income series. The BEA series includes some items not included in the census definition of income, such as income "in kind," income received by nonprofit institutions, the value of services of banks and other financial intermediaries rendered to persons without assessment of specific charges, and medicare payments. On the other hand census income data include contributions for support received from persons not residing in the same household and employee contributions for social insurance.

Suppression of Data for Confidentiality

To maintain the confidentiality promised respondents and required by law, the Census Bureau suppresses data for some characteristics which are based on a small number of persons and/or housing units in the geographical area.

Generally the counts of total population by race and Spanish origin and the counts of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed.

Other characteristics of persons are shown only if there are 15 or more persons in the geographical area, and characteristics of families, households, or occupied housing units are shown only if there are at least five occupied units within the geographical area.

Sometimes in printed Census reports data are reported for racial groups or the Spanish origin population only if there are 400 or more such persons in the geographical area. These decisions are based on space requirements for the display of data. More complete information is available on the census tapes.

Complete-Count Data and Sample Data

In the 1980 census an attempt was made to enumerate every person and housing unit in the United States on a questionnaire that requested basic demographic information (race, age, relationship, etc.). The answers to these questions provide complete-count or 100-percent data. In addition, a sample of persons and housing units was enumerated on a questionnaire that requested additional information (income, occupation, fuels used for house heating, etc.).

The basic sampling unit for the 1980 census was the housing unit, including all occupants. For persons living in group quarters, the sampling unit was the person. Two sampling rates were employed. In counties, incorporated places, and minor civil divisions estimated to have fewer than 2,500 persons, one-half of all housing units and persons in group quarters were included in the sample. In all other areas, one-sixth of the housing units or persons in group quarters were sampled. The purpose of this method was to provide relatively more reliable estimates for small places. When both sampling rates were taken into account across the U.S., approximately 19 percent of the nation's housing units were included in the census sample.

In this Handbook tables from sample data are identified by an asterisk (*) after the title. Tables without an asterisk are taken from complete-count (100 percent) data. Sample data may differ somewhat from complete count figures that would have been obtained if all housing units, persons within those housing units, and persons living in group quarters had been enumerated. When items are available on complete-count and on sample tables, the complete-count figures are preferable to use.

The deviation of a sample estimate from the average of all possible samples is called the sampling error. The standard error of a survey estimate is a measure of the variation among the estimates from the possible samples and thus is a measure of the precision with which an estimate from a particular sample approximates the average result of all possible samples. The sample estimate and its estimated standard error permit the construction of interval estimates with prescribed confidence that the interval includes the average result of all possible samples. Standard errors and confidence intervals for data items and geographical areas are available in tables in the printed census reports.

In Appendix C there is a description of which census reports and tapes have complete-count data and which have sample data.

Listed on the next page are 100-percent subject items and sample items included in the 1980 census.

100-Percent Items

Population
Household relationship
Sex
Race
Age
Marital status
Spanish/Hispanic origin or descent

Housing
Number of units at address
Access to unit
Complete plumbing facilities
Number of rooms
Tenure (whether unit is owned or rented)
Condominium identification
Value of home (owner-occupied units and condominiums)
Contract rent (renter-occupied units)
Vacant for rent, for sale, etc., and duration of vacancy

Sample Items

Population
School enrollment
Educational attainment
State or foreign country of birth
Citizenship and year of immigration
Current language and English proficiency
Ancestry
Place of residence 5 years ago
Activity 5 years ago
Veteran status and period of service
Presence of disability or handicap
Children ever born
Marital history
Employment status last week
Hours worked last week
Place of work
Travel time to work
Means of transportation to work
Number of persons in carpool
Year last worked
Industry
Occupation
Type of employment
Number of weeks worked in 1979
Usual hours worked per week in 1979
Number of weeks looking for work in 1979
Amount of income in 1979 by source

Housing
Type of unit and units in structure
Stories in building and presence of elevator
Year built
Year moved into this house
Acreage and crop sales
Source of water
Sewage disposal
Heating equipment
Fuels used for house heating, water heating, and cooking
Costs of utilities and fuels
Complete kitchen facilities
Number of bedrooms
Number of bathrooms
Telephone
Air conditioning
Number of automobiles
Number of light trucks and vans
Homeowner shelter costs for mortgage, real estate taxes, and hazard insurance

Nonsampling Error

Nonsampling error is present in both sample and complete-count data. If left unchecked, these errors could introduce serious bias into the data. While it is impossible to eliminate completely nonsampling errors from an operation as large and complex as the 1980 census, the Bureau of the Census attempted to control the sources of such errors during collection and processing operations. The primary sources of nonsampling error and the programs instituted for control of these errors are described below.

Undercoverage. It is possible for some households or persons to be missed entirely by the census. This undercount can introduce biases into the data, particularly if the undercount is more serious for certain demographic sub-groups than for others. The Census Bureau has estimated that the 1970 census did not count 2.5 percent of the U.S. population. For 1980, several extensive programs were developed to insure a more nearly complete count. Although the evaluation of the 1980 count has not be completed, preliminary estimates indicate that the coverage in the 1980 census was improved.

Respondent and enumerator error. The person answering the questionnaire or responding to the questions posed by an enumerator could offer incorrect or incomplete information. Also, the enumerator could misinterpret or otherwise incorrectly record information given by a respondent.

Processing errors. The field editing, followup, transmittal of completed questionnaires, manual coding of write-in responses, electric data processing, etc. all represent potential sources for the introduction of nonsampling error.

Nonresponse. Some respondents did not answer particular questions on the census questionnaire.

Editing of unacceptable data. In the field, questionnaires were reviewed for omissions and certain inconsistencies and, if necessary, a followup was made to obtain missing information. In addition, a similar review of questionnaires was done in the central processing offices. As a rule, however, editing was performed by hand only when it could not be done effectively by machine.

Allocation procedures. Allocations, or assignments of acceptable codes in place of unacceptable entries, were needed most often when an entry for a given item was lacking or when the information reported for a person on that item was inconsistent with other information for that person. As in previous censuses, the general procedure for changing unacceptable entries was to assign an entry for a person that was consistent with entries for other persons with similar characteristics. For example, a persons reported as a 20-year-old son of a householder, but for whom marital status was not reported, was assigned the same marital status as that of the last son processed in the same age group. The printed census reports contain tables which report the allocation rates for subject areas and geographical areas. The allocation rate for age in Florida was 3.4 percent; it varied in Florida counties from 6.7 percent in Dixie County to 1.9 percent in Hendry County.

Substitution procedures. Substitution is the assignment of a full set of characteristics for a person or a housing unit. If the housing unit is determined to be occupied, the housing characteristics are assigned from the previously processed occupied unit. If the housing unit is vacant, the housing characteristics are assigned from the previously processed vacant unit. When there was indication that a housing unit was occupied but the questionnaire contained no information for all or most of the people, although persons were known to be present, a previously processed household was selected as a substitute and the full set of characteristics for each substitute person was duplicated. The census reports also contain tables giving substitution rates.

Specific tolerances were established for the number of computer allocations and substitutions permitted.

Corrected Census Figures

After the final census tabulations are computed and the census reports and tapes are issued, the Census Bureau continues to issue corrections to the total population numbers as they become official. Listed below are corrected total population figures for Florida and seven counties. Because the changes are very small and because the corrected numbers are not applied by the Census Bureau to all the population and housing characteristics previous released, no attempt has been made to incorporate these corrections into the total population numbers on the tables in this book.

	1980 population		
Area	As shown on tables in this Handbook	As corrected by the Census Bureau	Difference
Florida	9,746,324	9,746,424	+100
Alachua	151,348	151,369	+21
Broward	1,018,200	1,018,257	+57
Dade	1,625,781	1,625,724	-57
Gadsden	41,565	41,674	+109
Manatee	148,442	148,445	+3
Palm Beach	576,863	576,812	-51
Pasco	193,643	193,661	+18

GLOSSARY: APPENDIX B

Ability to speak English. See Language spoken at home.

Age. The age classification is based on the age of the person in completed years as of April 1, 1980. Median age data were computed from data for single years of age.

Air-conditioning. Air-conditioning is defined as the cooling of air by refrigeration unit. It does not include evaporative coolers, fans, or blowers which are not connected to a refrigeration unit. Air-conditioning may be supplied by a central system which air conditions a number of rooms or even a number of apartments or may be supplied by a room unit generally designed to cool one room (also perhaps adjacent rooms).

American Indians, Eskimos, and Aleuts. See Race.

Ancestry. Ancestry data are based on self-identification, and respondents were required to write their answers. Ancestry refers to a person's nationality group, lineage, or the country in which the person or the person's parents or ancestors were born before their arrival in the U.S. Persons reported their ancestry group regardless of the number of generations removed from their country of origin. Responses reflected the ethnic groups(s) with which persons identified, not necessarily the degree of attachment or association the person had with the particular group(s).

Ancestry and race are separate characteristics; therefore persons reporting a particular ancestry may be of any race. Ancestry is also different from other indicators of ethnicity, such as country of birth and language spoken at home.

Person who specified their ancestry as "American," or who listed a religious group were tabulated in the category, "ancestry not specified."

Armed forces. See Usual place of residence.

Asians. See Race.

Black persons. See Race.

Children. Those classified as "own child of householder" are sons and daughters, including stepchildren and adopted children, of the householder who have never been married and are under age 18.

Class of workers. Private wage and salary workers are persons who work for a private employer for wages, salary, commission, tips, pay-in-kind, or at piece rates. Private employers include churches and other nonprofit organizations.

Also defined as private wage and salary workers are persons who consider themselves self-employed but who work for corporations. In most cases these persons own or are a part of a group that owns controlling interest in the corporation.

Government workers are persons who work for any governmental unit, regardless of the activity of the particular agency.

Self-employed workers are persons who work for profit or fees in their own unincorporated business, profession, or trade, or who operated a farm. Included are the owner-operators of large stores and manufacturing establishments, as well as small merchants, independent craftpersons and professionals, farmers, peddlers, and other persons who conducted enterprises of their own.

Unpaid family workers are persons who work without pay on a farm or in a business operated by a person to whom they are related by blood or marriage. These persons are usually children or spouse of the owner of a business or farm. About one-fourth of the unpaid family workers are farm workers.

College students. See Usual place of residence and School enrollment.

Condominium housing units. A condominium involves ownership that enables a person to own an apartment or house in a development of similar units and to hold a common or joint ownership in common areas, hallways, entrances, elevators, etc. The owner has a deed to the individual unit and, very likely, a mortgage on the unit. A condominium housing unit need not be occupied by the owner to be counted as such.

Disability. See Work disability and Public transportation disability.

Districts or regions. Agencies of state government have designated various groups of counties as being parts of districts or regions. There are eleven planning districts, each containing several counties which have common interests and needs for planning development in the area. There are also service delivery districts designated by the Florida Department of Health and Rehabilitative Services. After each decennial census each state legislature is required to reapportion its population into congressional districts for purposes of equal representation in federal and local elections. The Bureau of Economic Research has defined market regions in Florida. A market region represents those counties from which a metropolitan area draws trade and in which its lending institutions make loans. Maps in Sections 1.00 and 8.00 define the areas of these districts or regions.

Earnings. See Income.

Educational attainment. See Years of school completed.

Employment. See Labor force status.

Families. A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. All persons in a household who are related to the householder are regarded as members of his or her family. Not all households contain families because a household may consist of a group of unrelated persons or one person living alone.

A "married-couple family" is a family in which the householder and spouse are counted as members of the same household.

The count of families and family householders is identical.

"Persons per family" is obtained by dividing the number of persons in families by the total number of families (or family householders).

Family householders. See Householders.

Family income. See Income.

Farm population. See Rural farm population.

Fertility ratio. Ther fertility ratio reported in census reports is the number of children under age five per 1,000 women aged 15 to 49.

Fuels used for house heating, water heating, and cooking. Utility gas is gas piped through underground pipes from a central system that serves the neighborhood. Bottled, tank, or LP gas is stored in tanks which are refilled or exchanged when empty. Fuel oil, kerosene, etc. includes fuel oil, kerosene, gasoline, alcohol, and other combustible liquids. For data on house heating fuel, other fuel includes purchased steam, coal dust, briquettes made of pitch and sawdust, waste materials such as corn cobs, etc. For data on water heating fuel, other fuel includes coal or coke and wood. For data on cooking fuel, other fuel includes fuel oil, kerosene, coal or coke, wood, as well as coal dust briquettes, etc.

Group quarters. All persons not living in households are classified as living in group quarters. Two general categories of persons in group quarters are recognized: inmates of institutions and those in other group quarters.

Inmates of institutions are persons under care or custody in institutions regardless of their length of stay in that place and regardless of the number of people in the place. Institutions include homes, schools, hospitals, or wards for the physically or mentally handicapped; hospitals or wards for mental, tubercular, or chronic disease patients; homes for unmarried mothers; nursing, convalescent, and rest homes for the aged and dependent; orphanages; and correctional institutions.

Other group quarters includes all persons living in group quarters who are not inmates of institutions.

Rooming and boarding houses, communes, workers' dormitories, convents or monasteries, and other types of living quarters are classified as group quarters if 10 or more unrelated persons share the unit.

Persons in certain other types of living arrangements are classified as living in group quarters regardless of the number or relationship of people in the unit. These include persons residing in military barracks, on ships, in college dormitories, or in sorority and fraternity houses; patients in hospitals who have no usual residence elsewhere; staff members in institutional quarters; and persons counted in missions, flophouses, shelters, railroad stations, etc.

Household income. See Income.

Householders. Usually the householder is the person, or one of the persons, in whose name the home is owned or rented and who is listed in column one of the census questionnaire. If there is no such person in the household, any adult household member could be designated as "householder." Because one person in each household is designated as "householder," the count of householders and households is identical. Household and family relationships are determined by the person's relationship to the householder.

A family householder is a householder living with one or more persons related to him or her by birth, marriage, or adoption.

A nonfamily householder is a householder living alone or with nonrelatives only.

Households. A household includes all the persons who occupy a housing unit. For that reason, the counts of households and occupied housing units are always identical. "Persons per household" is obtained by dividing the number of persons living in households by the number of households (or householders).

Housing units. A housing unit is a house, an apartment, a group of rooms, or a single room occupied as a separate living quarters, or if vacant, intended for occupancy as a separate living quarters. Separate living quarters are those in which occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements.

Year-round housing units include all occupied units plus vacant units available or intended for year-round use. Excluded are vacant units intended for seasonal occupancy and vacant units held for migratory labor. These latter categories are included, however, in counts of the total housing inventory.

Occupied housing units include those which are the usual place of residence of the person or group of persons living there at the time of enumeration, or those from which the occupants are only temporarily absent (away on vacation, etc.). If all the persons staying in the unit at the time of the census have their usual place of residence elsewhere, the unit is classified as vacant.

Vacant housing units are those in which no one is living at the time of enumeration, unless the occupants are only temporarily absent. Units temporarily occupied at the time of enumeration entirely by persons who have a usual residence elsewhere are also classified as vacant.

New units not yet occupied are classified as vacant units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if they are open to the elements (the roof, walls, windows, and/or doors no longer protect the interior) or if there is positive evidence (such as a sign on the house or on the block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as an office or a storage area.

Vacant housing units are classified as either "seasonal and migratory" or "year-round." Seasonal units are intended for occupancy during only certain seasons of the year. Included are units intended for recreational use (beach cottages, etc.) and units held for hunters or loggers. Migratory units are vacant units held for occupancy by migratory labor employed in farm work during crop season. Year-round vacant units are available or intended for occupancy at any time of the year. A unit in a resort area which is usually occupied on a year-round basis is considered as year-round. A unit used only occasionally throughout the year is also considered as year-round.

Vacant year-round units being offered "for sale only" include individual units in cooperatives and condominium projects if the individual units are offered for sale only.

Vacant year-round units classified as "for rent" are those offered for rent and offered either for rent or for sale.

Units classified as "rented or sold, awaiting occupancy" are those for which money rent has been paid or agreed upon but the new renter has not moved in, or those recently sold and the new owner has not yet moved in.

Units "held for occasional use" include those held for weekend or other occasional use throughout the year. This category includes shared ownership or time-sharing condominiums and usually also includes homes reserved by their owners as second homes, although some second homes may be classified as seasonal.

"Other vacant" units include vacant year-round units which do not fall into any other vacancy category. Usually these are units held for settlement of an estate, units held for occupancy by a caretaker, and units held for personal reasons by the owner.

Owner-occupied housing units are ones in which the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for.

Renter-occupied units are all units not classified as owner-occupied, including those rented for cash rent and those occupied without payment of cash rent.

Income. Information on money income received in the calendar year 1979 was requested from persons aged 15 and over. Income is the sum of amounts reported separately for wage and salary income; nonfarm net self-employment income; farm net self-employment income; interest, dividend, net royalty or rental income; social security or railroad retirement income; public assistance or welfare income; and all other income.

Earnings are the sum of wage and salary income and net income from farm and nonfarm self-employment. Earnings are reported before deductions for personal income taxes, social security, bond purchases, union dues, or other deductions.

Receipts from the following sources were not included as income: money received from the sale of property; the value of income "in-kind" from food stamps, public housing subsidies, medical care, employer contributions for pensions, etc.; withdrawal of bank deposits; money borrowed; tax refunds; exchanges of money between relatives living in the same household; gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Interest, dividend, or net rental income includes interest on savings or bonds, dividends from stockholdings or membership in associations, net royalties, and net income from rental of property to others and receipts from boarders or lodgers.

Social security income includes social security pensions and survivors benefits and permanent disability insurance payments made by the Social Security Administration prior to deductions. Medicare reimbursements are not included.

Public assistance income includes three items: supplementary security income payments made by federal or state welfare agencies to low income persons who are aged (aged 65 or over), blind, or disabled; aid to families with dependent children; and general assistance. Separate payments received for hospital or other medical care are excluded.

Other income includes unemployment compensation, veterans' payments, public or private pensions, alimony or child support, workers' compensation, periodic payments from estates and trust funds, periodic receipts from annuities or insurance, contributions received periodically from persons not living in the household, military family allotments, net gambling winnings, and other kinds of periodic income other than earnings.

Household income includes the income of the householder and all other persons aged 15 and over in the household, whether related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

Family income is compiled by summing and treating as a single amount the income of all family members aged 15 and over. Although the income statistics cover the calendar year 1979, the characteristics of persons and the composition of families refer to the time of enumeration (April 1980). Thus, the family income does not include amounts received by members of the family during all or part of 1979 if these persons no longer resided with the family in April 1980. On the other hand, family income amounts reported by related persons who did not reside with the family during 1979 but who were members of the family in April 1980 are included. However, the composition of most families was the same during 1979 as in April 1980.

Median income is the amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median. For households, families, and unrelated individuals the median income is based on the distribution of the total number of units including those with no income. The median for persons is based on persons with income.

Mean income is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe. Thus, mean household income is obtained by dividing total household income by the total number of households. For various types of income the means are based on households having those types of income.

Industrial classification system. The industry classification system developed for the 1980 census consists of 231 categories classified into 13 major industry groups. This census classification was developed from the 1972 Standard Industrial Classification Manual (SIC), published by the Executive Office of the President, Office of Management and Budget, and the 1977 supplement to that manual. The major industry groups and their equivalent SIC codes are as follows:

- Agriculture (01, 02, 07)
- Forestry and fisheries (08, 09)
- Mining (10-14)
- Construction (15-17)
- Manufacturing (20-39)
  - Durable goods (20-23, 26-31)
  - Nondurable goods (24-25, 32-39)
- Transportation, communications, and other public utilities (40-49)
- Wholesale trade (50-51)
- Retail trade (52-59)
- Finance, insurance, and real estate (60-67)
- Services (70-89)
- Public administration (91-97)

Inmates of institutions. See Group quarters.

Interest, dividend, or net rental income. See Income.

Labor force status. See also Class of worker, Occupational classification system, and Industrial classification system. Data on labor force status relate to the calendar week preceding the date on which the census questionnaire was filled out (the reference week), the last week in March 1980 for the majority of persons. Labor force information is reported for persons aged 16 and over. Questions were designed to identify separately (a) persons who worked at any time during the reference week; (b) persons who did not work but had jobs or businesses from which they were temporarily absent (excluding layoff); (c) persons on layoff; and (d) persons who did not work but who were looking for work during the last four weeks and were available for work during the reference week.

Employed persons include all civilians aged 16 and over who were either (a) at work--those who did any work during the reference week as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a family farm or in a family business; or (b) with a job but not at work--those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons. Not counted as employed are persons whose only activity consisted of work around the house or volunteer work for religious, charitable, and similar organizations.

Unemployed persons include civilians aged 16 and over who were not employed, as defined above, and who were looking for work during the last 4 weeks and were available to accept a job. Jobseeking activities include registering at a public or private employment office, meeting with prospective employers, investigating possibilities for starting a business or professional practice, placing or answering advertisements, writing letters of application, and being on a union or professional register. Persons waiting to be called back to a job from which they were laid off are also counted as unemployed.

The civilian force consists of employed and unemployed persons as described above.

The labor force includes all persons in the civilian labor force plus persons on active duty with the U.S. Army, Air Force, Navy, Marine Corps, or Coast Guard.

Persons not in the labor force are those aged 16 and over who do not meet one of the criteria for being classified as members of the labor force. This category consists mainly of students, housewives, retired workers, seasonal workers enumerated in an off season and who were not looking for work, inmates of institutions, disabled persons, and persons doing incidental unpaid family work (less than 15 hours during the reference week).

Year-round full-time workers are persons aged 16 and over who usually worked 35 hours or more per week for 50 to 52 weeks in 1979.

The category "number of workers in family" counts as workers those persons aged 16 and over who worked one or more weeks in 1979. Work for pay or profit, work on a family farm or business, and weeks of active military service all qualify as work.

Language spoken at home. These statistics are intended to identify geographic areas with large numbers of nonEnglish speakers, areas with concentrations of speakers of a particular nonEnglish language, and areas where large numbers of limited English speakers reside. The questions asked were not intended to determine which language was a person's main language, or whether a person was fluent in the nonEnglish language. Therefore, persons who reported speaking a language other than English may have also spoken English at home, and they may have been more fluent in English than in the nonEnglish language.

Responses about ability to speak English were extremely subjective; they were the person's own perception about his or her own ability or, because census forms are usually filled out by one household member, may have represented the perception of another household member.

Marital status. Marital status classification refers to the status at the time of enumeration. Persons reported as separated are those living apart because of marital discord, with or without a legal separation. Persons in common-law marriages are classified as now married; persons whose only marriage has been annulled are classified as never married; all persons under age 15 are classified as never married. All persons classified as never married are counted as single.

Married-couple families. See Families.

Means of transportation to work. Means of transportation to work refers to the principal mode of travel or the type of conveyance used by the person to get from home to work. Persons who used different means on different days were asked to specify the one used most often. Persons who used different means on the same day were asked to report the one used for the longest distance. The category "drive alone" includes persons who usually drove alone to work, as well as persons who were driven to work by someone who then drove back home or to a nonwork destination. "Carpool" includes workers who shared driving, drove others, or rode as a passenger.

Metropolitan population. The metropolitan population includes all persons living in metropolitan statistical areas (MSAs).

Metropolitan statistical areas (MSAs). These areas are designated by the U.S. Office of Management and Budget and are defined, in Florida, in terms of entire counties. An MSA is a geographical area with a large population nucleus together with adjacent communities which have a high degree of economic and social integration with that nucleus. These areas were designated as standard metropolitan statistical areas (SMSAs) before January 1983. It is these SMSA areas that appear in some of the census reports. New MSA designations were announced effective June 1983, after the publication of most census reports. Under the new definition, generally an area qualifies as an MSA in one of two ways: if there is a city of at least 50,000 population or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In addition to the county containing the main city, an MSA may include additional counties which have close economic and social ties to the central county. Population living in an MSA may be referred to as the metropolitan population.

See maps in Section 1.00 for lists of counties in SMSAs and MSAs.

Military personnel. See Usual place of residence.

Nonfamily householders. See Householder.

Nonmetropolitan population. The nonmetropolitan population includes all persons who do not live in metropolitan statistical areas (MSAs).

Nonpermanent residents. Nonpermanent residents are persons who indicated on the census form that everyone at the residence was staying only temporarily and had a usual home elsewhere. For general census purposes these people are counted at their usual place of residence, not at the nonpermanent or temporary residence. Only nonpermanent residents staying in housing units occupied entirely by persons with a usual home elsewhere are included. Persons staying in the house of a permanent resident are not included, nor are persons staying in hotels, motels, or campgrounds. Also excluded are persons whose nonpermanent residence is within the same census district office as their usual residence.

Nonrelatives. Any person in the household not related to the householder by birth, marriage, or adoption is a nonrelative. This category includes roomers, boarders, partners, roommates, paid employees, wards, and foster children.

Occupational classification system. The system developed for the 1980 census consists of 503 specific occupation categories arranged into 6 summary and 13 major occupation groups. This classification was developed to be consistent with the 1980 Standard Occupational Classification Manual (SOC), published by the U.S. Department of Commerce, Office of Federal Statistical Policy and Standards.

Managerial and professional specialty occupations include executives, administrators, engineers, scientists, doctors, teachers, librarians, counselors, etc.

Technical, sales, and administrative support occupations include health and other technologists and technicians, sales jobs, secretaries, bookkeepers, computer equipment operators, etc.

Service occupations include household and building services, police and firefighters, food service workers, etc.

Farming, fishing, and forestry occupations include farm operators and managers, as well as farm workers.

Precision production, craft, and repair occupations include mechanics and construction trades.

Operators, fabricators, and laborers include machine operators, assembly line workers, transportation occupations, etc.

Occupied housing units. See Housing units.

Owner-occupied housing units. See Housing units.

Place of birth. Place of birth is reported in terms of the mother's usual state or country of residence at the time of birth rather than in terms of the location of the hospital. Native-born persons are those born in the U.S., Puerto Rico, or an outlying area of the U.S. Also included is a small number of persons born at sea or in a foreign country but with at least one American parent. Persons not classified as native-born were classified as foreign-born.

Place of work. Place of work refers to the geographic location at which workers carried out their occupational activities. Persons who worked at more than one location were asked to report the one at which they worked the greatest number of hours during the week or the one at which they began work each day. Place-of-work locations are defined as "in area of residence" and "outside area of residence."

Data on place of work are based on approximately one-half the full census sample (see Appendix A). Therefore, figures on tabulations involving place of work may differ from tabulations based on the full sample. For example, the number of workers aged 16 and over from place-of-work counts may not agree with the same category shown for means of transportation to work tabulations.

Plumbing facilities. The category "complete plumbing for exclusive use" consists of units which have hot and cold piped water, a flush toilet, and a bathtub or shower inside the housing unit for the exclusive use of the occupants of the unit. "Lacking complete plumbing for exclusive use" includes those conditions when (1) all three specified plumbing facilities are present inside the unit, but are also used by another household; (2) some but not all the facilities are present; or (3) none of the three specified facilities is present.

Poverty status. Data on poverty status are derived from answers to the same questions as the income data. Poverty status is based on a definition originated in 1964 and subsequently modified by federal interagency committees in 1969 and 1980.

The income cutoffs used by the Bureau of the Census to determine the poverty status of families and individuals consist of 48 thresholds arranged by family size and by presence and number of family members aged 18 and under. Unrelated individuals and two-person families are differentiated by age of householder (See Table 5.19).

The total income of each family or unrelated individual in the sample is tested against the appropriate poverty threshold to determine poverty status of that family or unrelated individual. If the total income is less than the corresponding cutoff, the family or unrelated individual is classified as below the poverty level. The number of persons below the poverty level is the sum of the number of persons in families and the number of unrelated individuals with incomes below the poverty level.

The poverty thresholds are revised annually to allow for changes in the cost of living as reflected in the Consumer Price Index. Poverty thresholds are computed on a national basis only. No attempt has been made to adjust these thresholds for regional, state, or local variations in the cost of living.

An alternate level at 125 percent of the current poverty level provides information on those near the poverty level. The poverty thresholds of this alternate level are obtained by multiplying the income cutoffs on Table 5.19 by 1.25.

Persons for whom poverty status is determined include all persons except inmates of institutions, persons in military group quarters and in college dormitories, and unrelated individuals under age 15.

Private school. See School enrollment.

Public assistance income. See Income.

Public school. See School enrollment.

Public transportation disability. Persons are identified as having a public transportaion disability if they had a health condition which has lasted 6 or more months and which makes it difficult or impossible for them to use buses, trains, subways, or other forms of public transportation.

Race. The concept of race in census reports reflects self-identification by respondents; it does not denote any clear-cut scientific definition of biological stock.

Households and families are classified by the race of the householder.

White persons include those who indicated their race as "white," as well as persons who entered a response such as Canadian, German, Italian, Lebanese, or Polish.

Black persons includes those who indicated their race as Black or Negro, as well as persons who classified themselves as Jamaican, Black Puerto Rican, West Indian, Haitian, or Nigerian.

American Indians, Eskimos, and Aleuts include persons who classified themselves in one of these specific categories or who entered the name of a specific Inidan tribe.

Asians and Pacific Inslanders include persons who indicated their race as Japanese (also Nipponese and Japanese American), Chinese (also Taiwanese and Cantonese), Filipino, Korean, Vietnamese, Asian Indian, Hawaiian, Guamanian, or Samoan.

The "other" race category includes Asian and Pacific Islander groups not listed separately (Cambodian, Laotian, Pakestani, or Fiji Islander); persons who wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican; and persons who indicated other races not included in specific categories.

Rent. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. For vacant units, it is the rent asked at the time of enumeration. The statistics on rent are tabulated for "specified renter-occupied" housing units and for "specified vacant for rent" housing units which include renter units except one-family houses on 10 or more acres. Respondents were asked to excluded any rent paid for additional units or for business premises. Renter units occupied without payment of cash rent are shown separately as "no cash rent."

Renter-occupied housing units. See Housing units.

Residence. See Usual place of residence.

Residence in 1975. Residence in 1975 is used in conjunction with current residence to determine the extent of residential mobility. The category "same house" includes all persons 5 years old and over who did not move during the 5 years as well as those who had moved but by 1980 had returned to their 1975 residence. The category "abroad" includes those with residence in a foreign country, Puerto Rico, or an outlying area of the U.S. in 1975, including members of the armed forces and their dependents.

The number of persons who were living in a different house in 1975 is somewhat less than the total number of moves during the 5-year period. Some persons in the same house at the two dates had moved but by 1980 had returned to their 1975 residence. Other persons who were living in a different house had made one or more intermediate moves. For similar reasons, the number of persons living in a different county or a different state may be understated.

Rooms in housing units. Rooms consist of the number of whole rooms used for living purposes. These include living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, enclosed porches suitable for year-round use, and lodger's rooms. Excluded are strip or pullman kitchens, bathrooms, open porches, balconies, halls, half-rooms, utility rooms, unfinished attics or basements, or other space used for storage. A partially divided room is a separate room only if there is a partition from floor to ceiling.

Rural farm population. The farm population is identified only in rural areas and includes all persons living on places of one acre or more from which at least $1,000 worth of agricultural products were sold during 1979.

Rural population. The population not classified as urban constitutes the rural population.

School enrollment. Persons are classified as enrolled in school if they reported attending a "regular" school or college at any time between February 1 and April 1, 1980. Regular schooling is defined as nursery school, kindergarten, elementary school, and schooling which leads to a high school diploma or college degree. Schooling in trade or business schools, company training, or schooling obtained through a tutor is counted only if the course credits are transferable to a regular school or college. Nursery school is counted only if the school included instruction as an important and integral phase of its program. Children enrolled in "Head Start" programs and other similar preprimary programs were included as enrolled. Persons enrolled in school since February 1, 1980 who had not actually attended because of illness, etc. were counted as enrolled. Schooling not regarded as "regular" includes nursery schools which provide only custodial care; specialized vacational, trade, or business schools; on-the-job training; and correspondence courses.

A public school is defined as any school which is controlled and supported primarily by a local, state, or federal agency.

A church-related school is a private school which is controlled or supported primarily by a religious organization.

Social security income. See Income.

Spanish origin. Persons of Spanish origin are those who classified themselves in one of the Spanish origin categories listed on the questionnaire--Mexican, Puerto Rican, Cuban, or other Spanish/Hispanic origin. This latter category includes those whose origins are from Spain or the Spanish-speaking countries of Central or South America, or they are Spanish origin persons identifying themselves generally as Spanish, Spanish American, Hispanic, Latino, etc. Origin can be viewed as the ancestry, nationality group, lineage, or country in which the person or person's parents or ancestors were born before their arrival in the U.S.

Persons of Spanish origin may be of any race. Households and families are classified by the Spanish origin of the householder.

Standard metropolitan statistical areas (SMSAs). See Metropolitan statistical areas (MSAs).

Sub-county areas. The purpose of this Handbook is to present county information. The census reports and tapes contain numerous data items for sub-county areas: cities, places, urbanized areas, tracts, census county divisions, blocks, etc. See Appendix C for information on sources of census information. Definitions of these sub-county areas appear in the various census reports.

Telephones. A unit is classified as having a telephone if there is a telephone in the living quarters. Units where the respondent uses a telephone located inside the building but not in the respondent's living quarters are classified as having no telephone.

Tenure of housing units. See Housing units.

Transportation. See Public transportation disability, Means of transportation to work, and Travel time to work.

Travel time to work. Travel time to work refers to the total number of minutes that it usually took the person to get from home to work, including time spent waiting for public transportation, picking up passengers in carpools, and engaging in other activities related to getting to work.

Unemployment. See Labor force status.

Units in structure. A structure is a separate building that either has open space on all sides or is separated from other structures by dividing walls that extend from ground to roof. To determine the number of units in a structure, both occupied and vacant units were counted. The category "Mobile home or trailer, etc." includes mobile homes, trailers, boats, vans, etc.

Unrelated individuals. An unrelated individual can be identified in one of three ways: a householder living alone or with nonrelatives, a household member who is not related to the householder by blood, marriage, or adoption, or a person living in group quarters who is not an inmate of an institution.

Urban population. The urban population comprises all persons living in an urbanized area and in places (incorporated and unincorporated) of 2,500 or more inhabitants outside urbanized areas. (An urbanized area includes an incorporated place and adjacent densely settled surrounding area that together have a minimum population of 50,000.)

Usual place of residence. Each person enumerated in the 1980 census was counted as an inhabitant of his or her "usual place of residence," the place where the person lives and sleeps most of the time. This place may not be the same as the person's legal or voting residence. There are residence rules for certain categories of persons whose usual place of residence is not immediately apparent.

Members of the armed forces and their families were counted as residents of the area where they were living on census day (on a military installation or in the area "off base"). Personnel on each navy ship were attributed to the city designated by the navy as their homeport, except for ships deployed to the 6th or 7th fleet. These latter persons were counted as part of the overseas population.

Crews of U.S. flag ships berthed in a U.S. port or ships inside U.S. waters with a U.S. destination were attributed to that port or destination. Crews of U.S. flag ships inside the U.S. waters with foreign destinations were counted at the homeport of the ship. Crews of U.S. flag ships outside U.S. waters and crews of vessels flying a foreign flags were not counted.

College students were counted as residents of the area where they were living while attending college. Children in boarding school below college level were counted at their parental home.

Inmates of institutions who ordinarily live there for considerable periods of time were counted as residents of the area where the institution was located.

Citizens of foreign countries whose usual place of residence on census day was the United States were counted as residents of the area where they were living. Included were both legal and illegal residents and persons working or attending school in the United States. Excluded were all foreign citizens, for whatever reasons, living at an embassy, ministry, legation, chancellery, or consulate. Also excluded were persons temporarily visiting or traveling in the United States.

Vacant housing units. See Housing units.

Value of housing units. Value is the respondent's estimate of how much the property (house and lot) or condominium unit would sell for if it were for sale. For vacant units, value is the price asked for the property. Value statistics are presented for "specified owner-occupied" housing units and "specified vacant for sale only" housing units. These "specified" housing units include only one-family houses on less than 10 acres without a commercial establishment or medical office on the property. Mobile homes, trailers, boats, tents or vans occupied as a usual residence and owner-occupied noncondominium units in multi-family buildings are also excluded from value tabulations.

Vehicles available. Vehicles available refer to the number of households with vehicles available at home for the use of the members of the household. Included are passenger cars, pickup trucks, small panel trucks of one-ton capacity or less, as well as station wagons, company cars, and taxicabs kept at home for use of household members. Cars rented or leased for one month or more, police and government cars kept at home, and company vans and trucks of one-ton capacity or less are also included if kept at home and used for nonbusiness purposes. Dismantled cars, immobile cars used as a source of power for some piece of machinery, and vans and trucks kept at home but used only for business purposes are excluded. These statistics do not reflect the number of vehicles privately owned or the number of households owning vehicles.

White persons. See Race.

Work disability. Persons are identified as having a work disability if they have a health condition which has lasted 6 or more months and which limits the kind or amount of work they can do at a job. "Health condition" refers to both physical and mental conditions. Temporary health problems are not considered a health condition. Persons are considered limited in the kind or amount of work they can do if they are restricted in the kinds of jobs at which they are able to work or if they are unable to work at a full-time job.

Workers. See Labor force status and Class of workers.

Year householder moved into housing unit. Data are based on the information presented for the householder and refer to the year of the latest move. The year in which the householder moved is not necessarily the same year as the year other members of the household moved, but in the majority of cases the entire household moved at the same time.

Year-round housing units. See Housing units.

Year structure built. Year structure built refers to when the building was first constructed, not when it was remodeled, added to, or converted. For a houseboat, mobile home, or trailer, the manufacturer's model year is assumed to be the year built.

Years of school completed. Data on years of school completed applies only to progress in "regular" schools as defined under "School enrollment." The number in each category of highest grade completed includes three groups: persons who reported the indicated grade as the highest attended and finished; persons who attended the next highest grade but did not finish it; and persons still attending the next higher grade. Persons not completing the first elementary year are classified as having no years of school completed. Persons who dropped out of school but who later earned a diploma with an equivalency test are counted as high school graduates.

Percentage high school graduates includes persons who completed four years of high school by graduation or equivalency test and persons who report attendance at some level of college.

SOURCES OF CENSUS INFORMATION: APPENDIX C

The U.S. Census Bureau has released several kinds of data products in order to disseminate the results of the 1980 Census of Population and Housing:

--Printed reports: The Bureau produces many reports, often separately bound for each state or standard metropolitan statistical area.

--Microfiche: These card-shaped sheets of film provide a medium for dissemination of certain kinds of detailed information not available in printed form. Data from selected computer summary tapes are also available on microfiche.

--Summary data on computer tape: The Bureau provides five summary tapes with statistical information similar to the data found in reports, but often more detailed and sometimes for types of areas not covered in the reports.

--Microdata on tape: Public-use microdata samples provide the responses from a sample long-form questionnaire (with names, addresses, and detailed geography deleted to protect confidentiality) which can be tabulated by users to meet particular statistical needs.

--Maps: The Bureau produces maps which show area boundaries as well as maps that display data by geographical area.

--Special tabulations: Statistical information can be specially prepared by the Bureau at the request and expense of the user. The data can be furnished on computer tape, printouts, or microfiche.

This *Census Handbook* attempts to collect as much Florida county data as possible into one convenient source. The Census products themselves, of course, contain even more county data, as well as much information for the state, incorporated places, SMSAs, urbanized areas, and other areas.

Data for the United States comparable to what is included in this *Handbook* can be found in 5 printed U.S. reports available in most libraries:

PC80-1-A1	Number of Inhabitants: U.S. Summary
PC80-1-B1	General Population Characteristics: U.S. Summary
PC80-1-C1	General Social and Economic Characteristics: U.S. Summary
HC80-1-A1	General Housing Characteristics: U.S. Summary
HC80-1-B1	Detailed Housing Characteristics: U.S. Summary

The charts beginning on the next page give the numbers, titles, data items and geographical area covered in various final Census products which have Florida data. The printed reports should also be available in most libraries. The census tapes can be accessed through the facilities of the University of Florida Libraries or through other agencies which have the census tapes. Various universities, regional planning councils, newspapers, and private companies in Florida have the census tapes and can provide data on printouts or on tape.

For more information about these Census products and for ordering information contact Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233 (301/763-5820). The regional census office in Atlanta can also provide information: Census Bureau Regional Office, 1365 Peachtree Street, N.E., Atlanta, Georgia 30309 (404/881-2274).

CENSUS OF POPULATION--PRINTED REPORTS

NUMBER	TITLE	DESCRIPTION*	GEOGRAPHIC AREAS
PC80-1-A	NUMBER OF INHABITANTS	FINAL POPULATION COUNTS WITH COMPARISONS FROM PAST CENSUSES	STATES, COUNTIES, SMSAS, URBANIZED AREAS, INCORPORATED PLACES, CENSUS DESIGNATED PLACES, AND COUNTY SUBDIVISIONS
PC80-1-B	GENERAL POPULATION CHARACTERISTICS	DATA ON POPULATION SUBJECTS COLLECTED ON A 100-PERCENT BASIS	STATES, COUNTIES, SMSAS, URBANIZED AREAS, PLACES OF 1,000 OR MORE, COUNTY SUBDIVISIONS, AMERICAN INDIAN RESERVATIONS
PC80-1-C	GENERAL SOCIAL AND ECONOMIC CHARACTERISTICS	DATA ON POPULATION SUBJECTS COLLECTED ON A SAMPLE BASIS	STATES, COUNTIES, SMSAS, URBANIZED AREAS, PLACES OF 2,500 OR MORE, AMERICAN INDIAN RESERVATIONS
PC80-1-D	DETAILED POPULATION CHARACTERISTICS	DATA ON MOST OF THE POPULATION SUBJECTS COLLECTED ON A SAMPLE BASIS, PRESENTED IN DETAIL CROSS-CLASSIFIED BY AGE, RACE, SPANISH ORIGIN, AND OTHER CHARACTERISTICS	STATES, SMSAS OF 250,000 OR MORE; SOME SUBJECTS ALSO FOR CENTRAL CITIES OF SMSAS OF 250,000 OR MORE
PC80-2	SUBJECT REPORTS	DETAILED INFORMATION AND CROSS-CLASSIFICATIONS FOR PARTICULAR SUBJECTS	SOME REPORTS FOR U.S. ONLY; OTHERS FOR REGIONS, STATES, SMSAS, OR OTHER SELECTED AREAS
PC80-S-1	SUPPLEMENTARY REPORTS**	MISCELLANEOUS TOPICS, SOME PROVIDING ADVANCE RELEASE OF DATA PUBLISHED ELSEWHERE; OTHERS PROVIDING UNIQUE DATA	VARIES FROM REPORT TO REPORT

SEE FOOTNOTES AT END OF TABLE.

NUMBER	DESCRIPTION*
	COMPUTER TAPES--SUMMARY TAPE FILES
STF 1	THIS STF PROVIDES 321 CELLS OF COMPLETE-COUNT POPULATION AND HOUSING DATA. DATA ARE SUMMARIZED FOR THE UNITED STATES, REGIONS, DIVISIONS, STATES, SCSAS, SMSAS, URBANIZED AREAS, CONGRESSIONAL DISTRICTS, COUNTIES, COUNTY SUBDIVISIONS, PLACES, CENSUS TRACTS, ENUMERATION DISTRICTS IN UNBLOCKED AREAS, AND BLOCKS AND BLOCK GROUPS IN BLOCKED AREAS. THE DATA INCLUDE THOSE SHOWN IN THE PHC80-1, PHC80-3, AND PC80-1-A REPORTS.
STF 2	THIS STF CONTAINS 2,292 CELLS OF DETAILED COMPLETE-COUNT POPULATION AND HOUSING DATA, OF WHICH 962 ARE REPEATED FOR EACH RACE AND SPANISH ORIGIN GROUP PRESENT IN THE TABULATION AREA. DATA ARE SUMMARIZED FOR THE UNITED STATES, REGIONS, DIVISIONS, STATES, SCSAS, SMSAS, URBANIZED AREAS, COUNTIES, COUNTY SUBDIVISIONS, PLACES OF 1,000 OR MORE INHABITANTS, CENSUS TRACTS, AMERICAN INDIAN RESERVATIONS, AND ALASKA NATIVE VILLAGES. THE DATA INCLUDE THOSE SHOWN IN THE PHC80-2, PC80-1-B, AND HC80-1-A REPORTS.
STF 3	THIS STF CONTAINS 1,126 CELLS OF DATA ON VARIOUS POPULATION AND HOUSING SUBJECTS COLLECTED ON A SAMPLE BASIS. THE AREAS COVERED ARE THE SAME AS IN STF 1, EXCLUDING BLOCKS. THE DATA INCLUDE THOSE SHOWN IN THE PHC80-3 REPORTS.
STF 4	THIS STF IS THE GEOGRAPHIC COUNTERPART OF STF 2, BUT THE NUMBER OF CELLS OF DATA IS GREATER (APPROXIMATELY 8,400). STF 4 PROVIDES DATA COVERING VIRTUALLY ALL OF THE POPULATION AND HOUSING SUBJECTS COLLECTED ON A SAMPLE BASIS, AS WELL AS SOME OF THE COMPLETE-COUNT SUBJECTS. SOME OF THE STATISTICS ARE REPEATED FOR RACE, SPANISH ORIGIN, AND ANCESTRY GROUPS. DATA ARE SUMMARIZED FOR AREAS SIMILAR TO THOSE SHOWN IN STF 2, EXCEPT THAT DATA FOR PLACES ARE LIMITED TO THOSE WITH 2,500 OR MORE INHABITANTS. THE DATA INCLUDE THOSE SHOWN IN THE PHC80-2, PC80-1-C, AND HC80-1-B REPORTS.
STF 5	THIS STF CONTAINS OVER 100,000 CELLS OF DATA ON VARIOUS POPULATION AND HOUSING SUBJECTS COLLECTED ON A SAMPLE BASIS AND PROVIDES DETAILED TABULATIONS AND CROSS-CLASSIFICATIONS FOR STATES, SMSAS, COUNTIES, CITIES OF 50,000 OR MORE INHABITANTS, AND CENTRAL CITIES. MOST SUBJECTS ARE CLASSIFIED BY RACE AND SPANISH ORIGIN. THE DATA INCLUDE THOSE SHOWN IN THE PC80-1-D AND HC80-2 REPORTS.

SEE FOOTNOTES AT END OF TABLE.

NUMBER/NAME	DESCRIPTION*
	OTHER COMPUTER TAPE FILES
P.L. 94-171 POPULATION COUNTS	THE CENSUS BUREAU PROVIDES POPULATION TABULATIONS TO ALL STATES FOR LEGISLATIVE REAPPORTIONMENT/REDISTRICTING. THE FILE IS ISSUED ON A STATE-BY-STATE BASIS. IT CONTAINS POPULATION COUNTS CLASSIFIED BY RACE AND SPANISH ORIGIN. THE DATA ARE TABULATED FOR THE FOLLOWING LEVELS OF GEOGRAPHY AS APPLICABLE: STATES, COUNTIES, COUNTY SUBDIVISIONS, INCORPORATED PLACES, CENSUS TRACTS, BLOCKS AND BLOCK GROUPS IN BLOCKED AREAS, AND ENUMERATION DISTRICTS IN UNBLOCKED AREAS.
MASTER AREA REFERENCE FILES 1 AND 2 (MARF)	MARF1. THIS GEOGRAPHIC REFERENCE FILE IS AN EXTRACT OF STF1 DESIGNED FOR THOSE WHO REQUIRE A MASTER LIST OF GEOGRAPHIC CODES AND AREAS, ALONG WITH BASIC CENSUS COUNTS ARRANGED HIERARCHICALLY FROM THE STATE DOWN TO THE BLOCK GROUP AND ENUMERATION DISTRICT LEVELS AND IS ISSUED ON A STATE-BY-STATE BASIS. THE FILE CONTAINS RECORDS FOR STATES, COUNTIES, COUNTY SUBDIVISIONS, PLACES, CENSUS TRACTS, ENUMERATION DISTRICTS IN UNBLOCKED AREAS AND BLOCK GROUPS IN BLOCKED AREAS. EACH RECORD SHOWS THE TOTAL POPULATION BY FIVE RACE GROUPS, POPULATION OF SPANISH ORIGIN, NUMBER OF HOUSING UNITS, NUMBER OF HOUSEHOLDS, NUMBER OF FAMILIES, AND A FEW OTHER ITEMS. MARF2. THIS FILE IS THE SAME AS MARF1 WITH THE LATITUDE AND LONGITUDE COORDINATES FOR A REPRESENTATIVE POINT (CENTROID) IN EACH BLOCK GROUP (BG) OR ENUMERATION DISTRICT (ED) OUTSIDE BLOCK NUMBERED AREAS.
GEOGRAPHIC BASE FILE/DUAL INDEPENDENT MAP ENCODING (GBF/DIME)	THESE FILES ARE COMPUTER REPRESENTATIONS OF THE METROPOLITAN MAP SERIES, INCLUDING ADDRESS RANGES AND ZIP CODES, WHICH GENERALLY COVER THE URBANIZED PORTIONS OF SMSAS. GBF/DIME FILES ARE USED TO ASSIGN CENSUS GEOGRAPHIC CODES TO ADDRESSES (GEOCODING). THE FILES ARE AVAILABLE BY SMSA.
PUBLIC-USE MICRODATA SAMPLES	THERE ARE THREE MUTUALLY EXCLUSIVE SAMPLES: THE A SAMPLE INCLUDING 5 PERCENT OF ALL PERSONS AND HOUSING UNITS, AND THE B AND C SAMPLES EACH INCLUDING 1 PERCENT OF ALL PERSONS AND HOUSING UNITS. STATES AND MOST LARGE SMSAS WILL BE IDENTIFIABLE ON ONE OR MORE OF THE FILES. MICRODATA FILES ALLOW THE USER TO PREPARE CUSTOMIZED TABULATIONS. PUBLIC-USE MICRODATA SAMPLES ARE COMPUTERIZED FILES CONTAINING MOST POPULATION AND HOUSING CHARACTERISTICS AS SHOWN ON A SAMPLE OF INDIVIDUAL CENSUS RECORDS. THESE FILES CONTAIN NO NAMES OR ADDRESSES, AND GEOGRAPHIC IDENTIFICATION IS SUFFICIENTLY BROAD TO PROTECT CONFIDENTIALITY.

SEE FOOTNOTES AT END OF TABLE.

NUMBER/NAME	DESCRIPTION*
CENSUS/EEO SPECIAL FILE	THIS FILE PROVIDES SAMPLE CENSUS DATA WITH SPECIFIED RELEVANCE TO EEO AND AFFIRMATIVE ACTION USES. THE FILE CONTAINS TWO TABULATIONS, ONE WITH DETAILED OCCUPATIONAL DATA AND THE OTHER WITH YEARS OF SCHOOL COMPLETED BY AGE. THE DATA IN BOTH TABULATIONS ARE CROSSED BY SEX, SPANISH ORIGIN, AND RACE. THESE DATA ARE PROVIDED FOR ALL COUNTIES, FOR ALL SMSAS, AND FOR PLACES WITH A POPULATION OF 50,000 OR MORE.

*SEE APPENDIX A FOR A LIST OF DATA ITEMS IN THE 100-PERCENT COUNT AND IN THE SAMPLE COUNT.

**SUPPLEMENTARY REPORTS:

PC80-S1-1	AGE, SEX, RACE, AND SPANISH ORIGIN OF THE POPULATION BY REGIONS, DIVISIONS, AND STATES: 1980
PC80-S1-2	POPULATION AND HOUSEHOLDS BY STATES AND COUNTIES: 1980
PC80-S1-3	RACE OF THE POPULATION BY STATES: 1980
PC80-S1-4	POPULATION AND HOUSEHOLDS FOR CENSUS DESIGNATED PLACES: 1980
PC80-S1-5	STANDARD METROPOLITAN STATISTICAL AREAS AND STANDARD CONSOLIDATED STATISTICAL AREAS: 1980
PC80-S1-6	NONPERMANENT RESIDENTS BY STATE AND COUNTY: 1980
PC80-S1-7	PERSONS OF SPANISH ORIGIN BY STATE: 1980
PC80-S1-8	DETAILED OCCUPATION AND YEARS OF SCHOOL COMPLETED BY AGE, FOR THE CIVILIAN LABOR FORCE, BY SEX, RACE, AND SPANISH/HISPANIC ORIGIN: 1980
PC80-S1-9	STATE OF RESIDENCE IN 1975 BY STATE OF RESIDENCE IN 1980
PC80-S1-10	ANCESTRY OF THE POPULATION BY STATE: 1980
PC80-S1-11	CONGRESSIONAL DISTRICT PROFILES, 98TH CONGRESS
PC80-S1-12	ASIAN AND PACIFIC ISLANDERS POPULATION BY STATE: 1980
PC80-S1-13	NOT ASSIGNED
PC80-S1-14	POPULATION AND LAND AREA OF URBANIZED AREAS FOR THE UNITED STATES AND PUERTO RICO: 1980 AND 1970
PC80-S1-15	DETAILED OCCUPATIONS OF THE EXPERIENCED CIVILIAN LABOR FORCE BY SEX FOR THE UNITED STATES AND REGIONS: 1980 AND 1970
PC80-S1-16	RESIDENCE IN 1975 FOR STATES BY AGE, SEX, RACE, AND SPANISH ORIGIN: 1980
PC80-S1-17	CROSS MIGRATION FOR COUNTIES: 1975 THROUGH 1980

counties, cities and unincorporated areas of Florida. Published monthly and annually.

BEBR Data Base

A computerized data management system which contains extensive economic data for the United States, Florida and all counties. Provides easy access to current and historical data for Florida, any of its counties and metropolitan statistical areas and for the United States. Users can develop, edit, process and store their own data using BEBR Data Base software. Continuously updated. Available only by subscription.

County Profiles

Printouts of county historical data for population, housing/construction, employment by industry, gross and taxable sales and income and earnings from the BEBR Data Base. Continuously updated. Available for individual counties.

For pricing and ordering information, please write or call:

PUBLICATIONS OF THE BUREAU OF ECONOMIC AND BUSINESS RESEARCH

UNIVERSITY OF FLORIDA

Florida Statistical Abstract

Over 700 pages of current and historical information about the economy and demography of Florida, its counties and metropolitan areas. Published annually.

Florida Estimates of Population

Intercensal estimates of the population of Florida, its counties, cities and unincorporated areas. Also includes components of population change and density figures. Published annually.

Population Studies

Bulletins providing information on age, race and sex components of Florida population, household numbers and average household size, projections of population, discussions of estimation and projection methodology and other topics related to population. Published four times a year.

Economic Leaflets

Data, analyses and background information on state and regional economic and business topics for those interested in economic trends and developments in Florida Frequently contains current population, housing and personal income information. Published monthly.

Printouts of Gross and Taxable Sales Information

Printouts of sales information from the Florida Department of Revenue reports of gross and taxable sales for the 5 percent sales and use taxes. Available by county and by kind-of-business category. Issued monthly and annually.

The Florida Outlook

Detailed quarterly forecasts of the Florida economy, incisive analyses of economic developments in Florida and the nation and the outlook for seventeen of Florida's metropolitan areas. Published quarterly. Available only by subscription.

BEBR Monographs

Indepth analyses of topics relevant to an understanding of the Florida economic and business climate. Issued 3-5 times per year, in handy paperback format. Current titles include Population Projections in the Real World: Tests of Forecast Accuracy and Local Government Economic Analysis Using Microcomputers.

Building Permit Activity in Florida

Monthly comparisons, with an annual summary, of the value and number of units permitted in the state,
